

## RATIONALE FOR SCHOOL LEADERS AND MANAGERS

### LEARNING WALLS – MAKING LEARNING MAKE SENSE

When used effectively, our Learning Walls can impact significantly on Learning and Teaching by:

- Providing **consistency** to the focus for learning in every classroom throughout the school;
- Clearly demonstrating and displaying the school's commitment to creating a positive learning **culture** across the school;
- Clearly making the **links** between great **learning**, purposeful engagement, pupil **involvement** and high quality **teaching**;
- Clearly showing the **development** of a subject area during the period of study, be it a week, two or three weeks or half a term;
- Creating a genuine sense of pupil **engagement in learning** and a desire to **succeed**;
- Providing – a **consistent approach**, a **consistent structure** to learning and teaching; a **consistent format**, a consistent means of showing pupils that learning is a continuum and not just discrete 'chunks' of unconnected content; a **consistent language** – a '**language of learning**';
- Providing a seamless 'system' for **capturing learning and teaching which** encourages pupils to become **totally involved** and **to take responsibility for their own learning**.
